## Work EXPERIENCE

---

### Company SNAPTEC VIETNAM

Sep. '19 – Present

*Front-end Engineer*

#### Project: SaaS Theme

- **Description:** Developed a customizable website solution, enabling users to tailor design and functionality, including translations, icons, and more.
- **Technologies:** Javascript, NextJS, Redux, AWS (S3, Map)
- **Responsibilities:**
  - Mentored juniors, conducted code reviews, and consulted on system improvements.
  - Designed dynamic components and integrated country-specific payment methods.
  - Enhanced performance with code splitting, lazy loading, and caching.
- **Achievement:** Achieved A scores on GTmetrix (occasionally a B score during high traffic periods), improving load speed and reducing data transfer.

#### Project: MID Dashboard

- **Description:** Admin dashboard for simplified website configurations, reducing dependency on Magento admin.
- **Technologies:** JavaScript, NextJS, Redux, AWS (S3, Map, AppSync)
- **Responsibilities:**
  - Designed core UI components and migrated Magento functions to a new interface.
  - Improved UX and transitioned from REST APIs to GraphQL via AWS AppSync.

#### Project: PWA Magento

- **Description:** Customized an e-commerce site using Magento's PWA studio.
- **Technologies:** JavaScript, React, Redux.
- **Responsibilities:**
  - Maintained and enhanced features based on client requirements.
  - Researched and implemented optimizations to improve developer and user experiences.

#### Project: Instasalon Freelance

Aug. '21 – Nov. '23

- **Description:** Developed a scheduling and management system for nail salons in the US.
- **Technologies:** TypeScript, JavaScript, React Native, Redux, Firebase.
- **Responsibilities:**
  - Designed responsive UX/UI for tablet devices based on Figma prototypes.
  - Added features: real-time chat, appointment scheduling, drag-and-drop, in-app purchases, and offline capabilities.
  - Published apps on Google Play and AppStore, resolving rejections.

#### Personal SaaS:

May '24 – Present

- **Description:** E-commerce and sales management platform for SMBs.
- **Technologies:** TypeScript, Next.js, MongoDB, Prisma ORM, Redux, TailwindCSS, Docker.
- **Responsibilities:**
  - Built a Next.js 14 platform with server-side rendering and static generation..
  - Developed responsive UI with TailwindCSS, animations, and form validation.

## SKILLS

---

**Languages:** JavaScript, TypeScript, GraphQL

**Framework:** NextJS, React Native, Redux, Tailwind CSS, SCSS, styled-components

**Software:** Atlassian (Jira, Confluence), Figma, Android studio, VSCode, Git

## EDUCATION

---

**Hue University of Sciences**

2016 - 2020

*Bachelor degree - Software Engineering*

## Reward

---

**SNAPTEC - HERO OF THE YEARS**
